One of the greatest difficulties, that of securing and keeping a perfect wick surface on an Aladdin lamp, is at last a thing of the past. This new Aladdin reinforced wick turns the trick. No matter how satisfactory your Aladdin has been, this new wick will greatly improve its service to you. No more uneven wicks—a smooth beveled wick surface of equal height all around at all times gives you an Aladdin vastly more reliable than ever and reduces the likelihood of smoking to the very minimum.
